

Sacred Dimensions of the Pathwork

3-Day Engagement ONLINE

Living in the “NOW”...

The Only Reality That Is

Thursday 6/29 – Sunday 7/2, 2023

With Erena Bramos and Beth Hedquist

*A completely fearless state, without contraction or tension, is the state that makes a personality susceptible to the ever-existing bliss of the Universe. ... This state is immensely blissful. The longing for this bliss deep in the heart of all human beings can never be extinguished. Even when we fragment our consciousness and create the false reality of the three-dimensional world, inwardly we are still connected with the greater reality of eternal being and with the eternal “now point”. Our manifest consciousness will constantly strive for this state, whether we know it or not. This striving is in itself the motivating force to grow, to search, to move, to accept the temporary hardships which are self-created, and to walk through them as through tunnels, so as to free the self from all obstructions . **L215***

All human struggle, the Guide tells us, is fundamentally underlined by a battle between the desire to follow this longing and the resistance to it, which results in giving up on what our hearts know exists. This is the resistance fueled by images which have us living in the past and which color our expectation of the future... a resistance to recognizing and aligning with the “Intention” which infuses with purpose everything that exists. To live our lives honoring that “Intention,” honoring Cosmic Intelligence ... the “Will of God”... we need to realize that it lives in every situation. Our task is to deeply acknowledge that everything we create, everything we experience, is a psychic explosion that has run through millennia culminating in the particular expression of consciousness that is the present moment.

Please join us this weekend as we, together, explore the deeper meaning of these metaphysical truths and as we create the sacred space within which we can recognize how they apply to our lives.
