

Pathwork on
Groups

Pathwork Lecture 47 *The Wall Within* encourages group work, deep group work

24	... I should like to tell you that a plan has materialized for a second smaller group to be formed, similar to the first so-called inner circle. We would recommend this very much. In such common group work you can accomplish much. You can help one another. Everyone of you who is working in image-finding teams should get into additional group work where you can discuss your problems, difficulties, and successes . At the same time, it will help many to form a bond . We encourage and we bless this undertaking.
